

STRING TO INTEGER

Sunday, March 20, 2022 6:34 PM

$S \rightarrow '1234'$

$\text{int res} = '1' = \{\text{Ascii value} \Rightarrow 49\}$

$\text{res} = '1' - 48;$

Base Case:
 $\text{int } b = 0$
 $(s.length == 1)$

$\Rightarrow b = s.charAt(0) - 48;$

Calc. :

$s = 1234$

$\text{int } a = s.charAt(0) - 48;$

$\text{Pow} = s.length - 1$

$\text{res} = a \times 10^{\text{Pow}} + \text{string to int}(s.\text{substring}(1))$

Recursion :

$(a * \text{Math.Pow}(10, \text{input.length} - 1))$

+ would
String to Int
(input.substring
[1])
)
